Quality rating: Exceeding National Quality Standard

When busy and working families need more time outside of school hours and during school holidays, we provide engaging programs that are fun, safe and rewarding for MLC School students from Kindergarten to Year 6.

Conveniently located within the grounds of MLC Junior School, our programs offer a wide and diverse range of creative and recreational activities that are tailored to your child's unique interests, personality and abilities.

Our thoughtfully planned programs are designed to enhance many of the skills your child learns at school along with their life skills, while keeping them engaged and entertained.

Before and after school care

Each term, we set our program in consultation with the children. As well as encouraging their decision-making and independent thinking abilities, this means they're guaranteed to enjoy the extensive range of games and activities, arts and crafts, and social and life education opportunities available to them.

Vacation care

Our ever-changing holiday calendar directly involves and incorporates the children's ideas and interests, producing a widely varied and creative range of activities, excursions and experiences throughout the school holiday period. This could take your child from exploring old and new technology, playing football and gardening one week, to baking, investigating local history and practising mindfulness the next.

Social and diverse

The hours after school and school holiday periods are relaxed times for your child when they'll play and make friends with children of different ages and diverse backgrounds, while building on their existing friendships outside of the schoolroom. It's time meaningfully spent developing their social and communication skills and respect for others, boosting the confidence, wellbeing and emotional intelligence that produces well-rounded individuals.
